

# ELECTRONIC PRINTING CALCULATOR

## CALCULADORA IMPRESORA ELECTRÓNICA

### OPERATION MANUAL

#### MANUAL DE MANEJO

EL-1750V

For USA only:  
This product contains a CR Coin Lithium Battery which contains Perchlorate Material – special handling may apply, California residents.  
See [www.dtsc.ca.gov/hazardouswaste/perchlorate/](http://www.dtsc.ca.gov/hazardouswaste/perchlorate/)

**WARNING – FCC Regulations state that any unauthorized changes or modifications to this equipment not expressly approved by the manufacturer could void the user's authority to operate this equipment.**

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

### SHARP CORPORATION

#### OPERATIONAL NOTES

To insure trouble-free operation of your SHARP calculator, we recommend the following:  
1. The calculator should be kept in areas free from extreme temperature changes, moisture, and dust.  
2. A soft, dry cloth should be used to clean the calculator. Do not use solvents or a wet cloth.  
3. Since this product is not waterproof, do not use it or store it where fluids, for example water, can splash onto it. Raindrops, water spray, juice, coffee, steam, perspiration, etc. will also cause malfunction.  
4. If service should be required, use only a SHARP servicing dealer, a SHARP approved service facility or SHARP repair service.

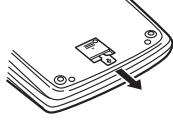

SHARP will not be liable nor responsible for any incidental or consequential economic or property damage caused by misuse and/or malfunctions of this product and its peripherals, unless such liability is acknowledged by law.

#### USING THE CALCULATOR FOR THE FIRST TIME

First, pull out the insulation sheet for the memory protection battery (installed for retaining the date/time/tax rate information). Reset the calculator to initialize the unit's state, then adjust the date and time before using the calculator.

#### Removing the insulation sheet, and resetting

1. Pull out the insulation sheet for the memory protection battery.

2. Press the RESET switch located on the back of the unit.

(See "RESETTING THE UNIT".)

\* The clock starts, indicating the current date and time as January 1, 2008, 12:00:00 a.m.

#### Adjusting date and time

Example: When the date is September 15, 2007, and the time is 3:38 p.m.

#### NOTAS AL MANEJARLA

A fin de que su calculadora SHARP funcione sin averías, le recomendamos lo siguiente:  
1. Evite dejar la calculadora en ambientes en que haya cambios de temperatura, humedad y polvo bastante notables.  
2. Al limpiar la calculadora, utilice un paño suave y seco. No use disolventes ni tampoco un paño húmedo.  
3. Debido a que este producto no es a prueba de agua, no deberá ser utilizado o guardado en lugares donde pudiera ser salpicado por líquidos como, por ejemplo, agua. Las gotas de lluvia, salpicaduras de agua, jugos o zumos, café, vapor, exposición, etc. también perjudican el funcionamiento del producto.  
4. Si necesita reparar esta unidad, diríjase sólo a un distribuidor SHARP, a un centro de servicios autorizado por SHARP o a un centro de reparaciones SHARP.

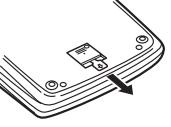

SHARP no será responsable de ningún daño imprevisto o resultante, en lo económico o en propiedades, debido al mal uso de este producto y sus periféricos, a menos que tal responsabilidad sea reconocida por la ley.

#### UTILIZACIÓN DE LA CALCULADORA POR PRIMERA VEZ

En primer lugar, tire de la lámina aislante para la pila de protección de la memoria (instalada para conservar la información sobre la fecha/hora/tasa de impuestos). Reponga la calculadora para inicializar el estado de la unidad, y después ajuste la fecha y la hora antes de utilizarla.

#### Extracción de la lámina aislante, y reposición

1. Tire de la lámina aislante para la pila de protección de la memoria.

2. Pulse el interruptor RESET situado en la parte posterior de la unidad. (Consulte "REPOSICIÓN DE LA UNIDAD".)

\* El reloj se pondrá en funcionamiento, indicando la fecha y la hora actuales con 1 de enero, 2008, 12:00:00 a.m.

#### Ajuste de la fecha y la hora

Ejemplo: Cuando la fecha sea el 15 de septiembre de 2007, y la hora las 3:38 p.m.

#### Operación Visualización

Operación	Visualización
GT RATE 9 [ ] 15 [ ] 2007 [ ] 15 [ ] 38 [ ] [ ]	9-15-2007 3:38:00 P 0.

(consulte "SELECCION DEL MODO DE TOTAL GLOBAL / FIJACIÓN DE TASA")

\* Cuando finalice el ajuste, el reloj comenzará a funcionar a las 3:38:00 p.m.

#### OPERATING CONTROLS

##### POWER SWITCH; PRINT / ITEM COUNT MODE SELECTOR:

"OFF": Power OFF

"\*": Power ON. Set to the non print mode.

"P": Power ON. Set to the print mode.

"P+IC": Power ON. Set to the print and item count mode.

1) For addition or subtraction, each time [+] is pressed, 1 is added to the item counter, and each time [-] is pressed, 1 is subtracted.  
\* The count is printed when the calculated result is obtained.

\* Pressing of [ ] [ ] [ ] clears the counter.

2) When the grand total/rate setting mode selector is in the ON position (GT), the counter will count the number of times that the calculation results have been stored in the grand total memory. To print and clear the count, press the [GT] key.

3) The memory item counter will count the number of times that the [M+/-] key has been pressed in the addition.

Note: \* Each time the [M-] key is used in the subtraction, 1 will be subtracted from the count.

\* The count is printed when the memory is recalled.

\* Pressing of the [M+/-] key clears the counter.

Note: The counter has a maximum capacity of 3 digits (up to 999). If the count exceeds the maximum, the counter will recount from zero.

##### ROUNDING SELECTOR:

Example: Set Decimal Selector to 2.

$4 \div 9 = 0.444 \dots$ ,  $5 \div 9 = 0.555 \dots$

4	[ ]	9	[ ]	5	[ ]	9	[ ]
0.45		0.56		0.44		0.56	
0.44		0.55		0.44		0.55	

Note: The decimal point floats during successive calculation by the use of [ ] or [+]. If the decimal selector is set to "F" then the answer is always rounded down (0).

##### GRAND TOTAL / RATE SETTING MODE SELECTOR:

"GT": Grand Total

"\*": Neutral

"RATE SET": To set the date, time, and tax rate, set this switch at the "RATE SET" position.

**Date:**  
Enter in the order of month, day and year, then press [ ] to complete the entry.

\* Use [ ] to separate month, day, and year.

\* When [ ] is pressed, the number entered is evaluated and displayed as "date" if the value is within the following range; "Error" is displayed otherwise, and the previously set date is restored.

Month: 1 - 12; day: 1 - 31; Year: 2000 - 2099 (in 4 digits) or 00 - 99 (in 2 digits)

**Time:**  
Enter in the order of hour, minutes, then press [ ] to complete the entry.

(There is no entry available for the seconds value. The clock starts at zero second.)

\* If the hour/minute digit is less than 10, it is not necessary to enter the first digit "0".

\* Use [ ] to separate hour and minute values.

\* When [ ] is pressed, the number entered is evaluated and displayed as "time" if the value is within the following range; "Error" is displayed otherwise, and the previously set time is restored.

Hour: 0 - 23 (24-hour system for the hour entry); Minute: 0 - 59

**Tax rate:**  
Press [ ] three times, enter the tax rate, followed by [ ].

\* A maximum of 4 digits can be stored (decimal point is not counted as a digit).

\* Only one rate can be stored. If you enter a new rate, the previous rate will be cleared.

##### DECIMAL / ADD MODE SELECTOR:

"3 2 0": Presets the number of decimal places in the answer.

"F": The answer is displayed in the floating decimal system.

"A": The decimal point in addition and subtraction entries is automatically positioned to the 2nd digit from the lowest digit of entry number. Use of the add mode permits addition and subtraction of numbers without entry of the decimal point. Use of [ ] and [ ] will automatically override the add mode and decimal correctly answers will be printed.

**CLOCK / CALENDAR KEY:**  
• Each time this key is pressed, the mode switches.  
• Calculation mode → Date display mode → Clock display mode → Calculation mode  
• Use this key also to adjust date and time (see "GRAND TOTAL / RATE SETTING MODE SELECTOR").

##### PAPER FEED KEY

##### LAST DIGIT CORRECTION KEY

**NON-ADD / SUBTOTAL KEY:**  
Non-add – When this key is pressed right after an entry of a number in the Print mode, the entry is printed on the left-hand side with the symbol "#". This key is used to print out numbers not subject to calculation such as code, date, etc.

**Subtotal** – Used to get subtotal(s) of additions and/or subtractions. When pressed following the [+] or [-] key, the subtotal is printed with the symbol "+" and the calculation may be continued.

By pressing this key even in the Non-print mode, the displayed number is printed without any symbol.

• When the POWER SWITCH; PRINT / ITEM COUNT MODE SELECTOR is set "P", "P+IC" position, and Date or Clock is displayed, press this key to print the displayed contents, including "#" symbol, from the left side of the paper roll.

Example:  
Date printing  
#9 - 15 - 2007 ..... (when the date is September 15, 2007)

Clock printing  
#10 : 30 ..... (when the time is 10:30 a.m.)

#6 : 25 ..... (when the time is 6:25 p.m.)

\* When the Date / Clock printing is complete, the Calculation mode is restored.

##### CLEAR / CLEAR ENTRY KEY

Press this key twice, followed by [ ] to print the set tax rate.

##### TOTAL KEY

##### EQUAL KEY

##### CHANGE SIGN KEY:

Changes the algebraic sign of a number (i.e., positive to negative or negative to positive).

##### RECALL AND CLEAR MEMORY KEY

##### RECALL MEMORY KEY

##### TAX-INCLUDING KEY

##### TAX- PRE-TAX KEY

##### GT GRAND TOTAL KEY

##### COST COST PRICE ENTRY KEY:

Press this key to enter the cost price.

##### SELL SELLING PRICE ENTRY KEY:

Press this key to enter the selling price.

##### MARGIN ENTRY KEY:

Press this key to enter the margin.

##### CHANGE CALCULATION KEY:

• To see how much change to return, have the price amount displayed, then enter the amount, followed by this key. The change is calculated in accordance with the DECIMAL / ADD MODE SELECTOR setup as well as the ROUNDING SELECTOR setup.

• The intermediate result of an addition or subtraction in the Change calculation is retained.

• While the POWER SWITCH; PRINT / ITEM COUNT MODE SELECTOR is placed in "P" or "P+IC", the pay amount is printed after "\*\*\*\*\*" and the change printed with "CG".

Note: The displayed change value will not be added to the grand total memory.

##### DISPLAY SYMBOLS:

M : Appears when a number is in the memory.

- : Appears when a number is negative.

G : Appears when a number is in the grand total memory.

E : Appears when an overflow or other error is detected.

TAX+: Appears when the total calculated includes tax.

TAX-: Appears when the total calculated excludes tax.

TAX : Appears when the tax rate is set.

##### INK ROLLER REPLACEMENT

If printing is blurry even when the ink roller is in the proper position, replace the roller.

Ink roller: Type EA-772R

**WARNING**  
APPLYING INK TO WORN INK ROLLER OR USE OF UNAPPROVED INK ROLLER MAY CAUSE SERIOUS DAMAGE TO PRINTER.

- Set the power switch to OFF.
- Remove the printer cover. (Fig. 1)
- Hold the top of the ink roller and remove the roller by pulling it toward you and then upward. (Fig. 2)
- Install the new ink roller in the correct position. Make sure that the roller is securely in place. (Fig. 3)
- Put back the printer cover.

Fig. 1

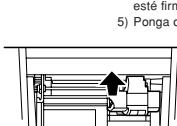

Fig. 2

## ERRORS

There are several situations which will cause an overflow or an error condition. When this occurs, "E" will be displayed. The contents of the memory at the time of the error are retained.

If "E 0." is displayed at the time of the error, "----" will be printed in red and  $\boxed{\text{E}}$  must be used to clear the calculator.

Also, in rare cases, printing may stop midway and the indication "E" will appear on the display. This is not a malfunction but is caused when the calculator is exposed to strong electromagnetic noise or static electricity from an external source. Should this occur, press the  $\boxed{\text{E}}$  key and then repeat the calculation from the beginning.

## Error conditions:

- When the integer portion of an answer exceeds 12 digits.
- When the integer portion of the contents of the memory or grand total memory exceeds 12 digits. (Ex.  $\boxed{M+} 999999999999 \boxed{M+} 1 \boxed{M+}$ )
- When any number is divided by zero. (Ex.  $5 \boxed{\div} 0 \boxed{=}$ )

## REPLACEMENT OF BATTERY FOR MEMORY PROTECTION

**Time for battery replacement**  
Life of the memory protection battery is approximately 2,500 hours at 25°C(77°F) with no operation battery installed, and the AC adaptor not connected.

\* When the memory protection battery is weak, the date/time setting is initialized (1/1/2008, 12:00:00 a.m.).

Verify the date/time setting in the date/clock display mode after replacing the operation battery or when connecting the AC adaptor with no operation battery installed.

If the date/time setting is modified or incorrect, promptly replace the memory protection battery with new one.

(The life of the pre-installed battery may be shorter than expected because of the time the calculator spends during shipment.)

## How to change the battery

Use one lithium battery (CR2032).  
**Caution:** Replacing the battery will clear the date and time settings, and the stored tax rate.

- Set the power switch to the "OFF" position, and disconnect the AC adaptor.
- Remove the battery cover on the back of the unit. (Fig. 1)
- Remove the exhausted battery and install one new lithium battery. Wipe the battery well with a dry cloth and place the plus "+" side upward. (Fig. 2)
- Replace the battery cover by reversing the removal procedure.
- Press the RESET switch on the back of the unit (See "RESETTING THE UNIT").

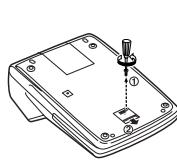

Fig. 1

Fig. 2

## After battery replacement

- Connect the AC adaptor, and set the power switch to the "ON" position.
- Check that "0." is displayed. If "0." is not displayed, remove the battery, reinstall it, and check the display again.
- Readjust date, time, and tax rate settings.
- In the box on the right, fill in the month/year that you changed the battery, as a reminder of when to change it again.

## Precautions on battery use

- Do not leave an exhausted battery in the equipment.
- Do not expose the battery to water or fire, and do not take it apart.
- Store batteries out of the reach of small children.

## Notes for handling Lithium batteries:

**CAUTION**  
Danger of explosion if battery is incorrectly replaced.  
Replace only with the same or equivalent type recommended by the manufacturer.  
Dispose of used batteries according to the manufacturer's instructions.

## SPECIFICATIONS

### Operating capacity: 12 digits

#### Power supply:

Operating:  
AC: Local voltage with AC adaptor EA-65A / 28A  
6V  $\Rightarrow$  (DC): Manganese dry battery, size AA (or R6)  $\times 4$  (Option)

Memory backup:  
3V  $\Rightarrow$  (DC): (Lithium battery CR2032  $\times 1$ )  
Memory Protection Battery lifespan:  
About 2,500 hours (While at 25°C(77°F), no operating battery is installed, and the AC adaptor is not connected.)

### CLOCK SECTION

Accuracy: Within  $\pm 60$  seconds per month average (at 25°C(77°F))

Items to be displayed: month, day, year, hour, minute, second, a.m., p.m., "P"

Items to be printed: month, day, year, hour, minute, a.m., "P", p.m., "

Time system: 12-hour

### PRINTING SECTION

Printer: Mechanical printer

Printing speed: Approx. 2 lines/sec.

(At temperature 25°C(77°F), when "741+9+" is printed. An AC adaptor EA-65A is used. The printing speed will vary with the number of rows and the figure types to be printed.)

Printing paper:  
57mm (2-1/4") - 58mm (2-9/32") wide  
80mm (3-5/32") in diameter (max.)

Operating temperature:  
0°C - 40°C (32°F - 104°F)

Power consumption: 6V  $\Rightarrow$  (DC): 1.8 W

Operating time: Manganese dry battery, size AA (or R6)

Approx. 4,500 hours (in non-print mode, displaying 555555 at 25°C (77°F) ambient temperature)

Operating time depends on the type of battery and type of use.

Dimensions:  
150 mm (W)  $\times$  230 mm (D)  $\times$  51.5 mm (H)

(5-29/32" (W)  $\times$  9-1/16" (D)  $\times$  2-1/32" (H))

Weight: Approx. 533 g (1.18 lb.) (with batteries)

Accessories:  
1 lithium battery (installed), 1 paper roll, 1 ink roller (installed), AC adaptor EA-65A, and operation manual

## RESETTING THE UNIT

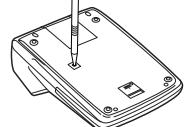

Strong impacts, exposure to electrical fields, or other unusual conditions may render the unit inoperative, and pressing the keys will have no effect. If this occurs, you will have to press the RESET switch on the bottom of the unit. The RESET switch should be pressed only when:

- an abnormal event occurs and all keys are disabled.

**Notes:**  
• Pressing the RESET switch will clear the date and time settings, the tax rate setting, and the memory contents.

• Use only a ballpoint pen to press the RESET switch. Do not use anything breakable or anything with a sharp tip, such as a needle.

• After the RESET switch is pressed, connect the AC adaptor. Turn the power switch "ON" and check that "0." is displayed.

## CALCULATION EXAMPLES

- Set the decimal selector as specified in each example.
- The rounding selector should be in the "5/4" position unless otherwise specified.
- The grand total/rate setting mode selector should be in the "P" position (off) unless otherwise specified.
- The print / item count mode selector should be in the "P" position unless otherwise specified.
- Press  $\boxed{\text{E}}$  prior to beginning any calculation.
- If an error is made while entering a number, press  $\boxed{\text{E}}$  or  $\boxed{\text{C}}$  and enter the correct number.
- After entering a value, press  $\boxed{\text{COST}}$ ,  $\boxed{\text{SELL}}$  or  $\boxed{\text{MON}}$  to activate the Cost/Sell/Margin Calculation mode. In case of performing different calculation tasks,  $\boxed{\text{E}}$ / $\boxed{\text{E}}$  key must be pressed first to cancel the Cost/Sell/Margin mode.
- Example procedures are listed in following manner unless otherwise specified.

Operation | Display | Print

## PRINTING DATE AND TIME

### IMPRESIÓN DE LA FECHA Y LA HORA

EXAMPLE: When on October 20, 2008, 1:52:00 p.m.

EJEMPLO: En el 20 de octubre de 2008, a las 1:52:00 p.m.

	10-20-2008	0.	#10-20-2008-----
	1-52-00 P	0.	#1-52-----

\*1: If the date is not shown on the display, press  $\boxed{\text{DATE}}$  to show the date.

\*2: Si la fecha no se muestra en el visualizador, pulse  $\boxed{\text{DATE}}$  para hacer que se indique.

## ERRORES

Existen diversos casos en los que ocurre un exceso de capacidad o una condición de error. Al producirse esto, aparecerá "E". El contenido de la memoria, en el momento del error, se conservará.

Si al ocurrir el error, se visualiza el símbolo "E 0.", se imprimirá en rojo "----" y se deberá usar  $\boxed{\text{E}}$  para borrar la calculadora.

Además, en casos muy raros, la impresión puede pararse en la mitad, y en el visualizador puede aparecer la indicación "E". Esto no significa mal funcionamiento, sino que se debe a que la calculadora ha estado expuesta a ruido electromagnético intenso o electricidad estática de una fuente externa. Cuando ocurra esto, pulse la tecla  $\boxed{\text{E}}$  y después repita el cálculo desde el principio.

### Condiciones de error:

- Cuando la parte entera de un resultado excede las 12 dígitos.
- Cuando la parte entera del contenido de la memoria o la memoria del total global supera 12 dígitos. (Ej.  $\boxed{M+} 999999999999 \boxed{M+} 1 \boxed{M+}$ )
- Cuando se divide un número cualquiera por cero.

(Ej.  $5 \boxed{\div} 0 \boxed{=}$ )

## CAMBIO DE LA PILA PARA PROTECCIÓN DE LA MEMORIA

### Plazo para cambiar la pila

La duración de la pila de protección de la memoria será de aproximadamente 2.500 horas a 25°C sin la pila de operación instalada, y el adaptador de CA no conectado.

\* Cuando la pila de protección de la memoria se debilite, se inicializará la fecha/hora (1/1/2008, 12:00:00 a.m.).

Verifique el ajuste de la fecha/hora en el modo de visualización de la fecha/reloj después de haber reemplazado las pilas de operación o cuando conecte el adaptador de CA sin la pila de operación instalada.

Si el ajuste de la fecha/hora se ha modificado o es incorrecto, reemplace inmediatamente la pila de protección de la memoria por otra nueva.

(La duración de la pila instalada en fábrica puede ser más corta de la esperada debido al tiempo transcurrido desde el envío de la calculadora.)

### Método de cambio de la pila

Utilice una pila de litio (CR2032).

**Precaución:** El reemplazo de la pila borrárá los ajustes de la fecha y la hora, y la tasa de impuestos almacenada.

- Ponga el interruptor de la alimentación en la posición "OFF", y desconecte el adaptador de CA.
- Retire la cubierta de la pila de la parte posterior de la unidad. (Fig. 1)
- Retire la pila agotada e instale una pila de litio nueva. Limpie bien la pila con un paño seco y coloque el lado positivo "+" hacia arriba. (Fig. 2)
- Vuelva a colocar la cubierta de la pila siguiendo a la inversa el procedimiento de retirada.
- Pulse el interruptor RESET de la parte posterior de la unidad (Consulte "REPOSICIÓN DE LA UNIDAD").

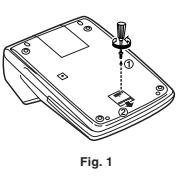

Fig. 1

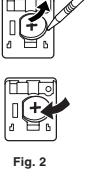

Fig. 2

## CONSTANT / CONSTANTES

## MIXED CALCULATIONS / CÁLCULOS MIXTOS

A.  $5 \times 2 + 12 =$

5	$\boxed{\times}$	2	$\boxed{=}$	5.	$5 \times$	$2+$	$10 \times$	$002 \cdots \cdots \cdots$	5.	$5 \times$	$2+$	$10 \times$	$002 \cdots \cdots \cdots$
10	$\boxed{+}$	12	$\boxed{+}$	10.	$10 \cdot$	$+$	$10 \cdot$	$002 \cdots \cdots \cdots$	22.	$22 \cdot$	$+$	$22 \cdot$	$002 \cdots \cdots \cdots$
2	$\boxed{+}$	5	$\boxed{=}$	12.	$12 \cdot$	$+$	$12 \cdot$	$002 \cdots \cdots \cdots$	60.	$60 \cdot$	$+$	$60 \cdot$	$002 \cdots \cdots \cdots$
5	$\boxed{+}$	10	$\boxed{+}$	5.	$5 \cdot$	$+$	$5 \cdot$	$002 \cdots \cdots \cdots$					

B.  $(10 + 2) \times 5 =$

10	$\boxed{+}$	2	$\boxed{+}$	10.	$10 \cdot$	$+$	$10 \cdot$	$002 \cdots \cdots \cdots$	60.	$60 \cdot$	$+$	$60 \cdot$	$002 \cdots \cdots \cdots$
2	$\boxed{+}$	5	$\boxed{=}$	12.	$12 \cdot$	$+$	$12 \cdot$	$002 \cdots \cdots \cdots$	60.	$60 \cdot$	$+$	$60 \cdot$	$00$
